TOPIC

1 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
\frac{4}{2}=2
$$

|  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $2 n^{2}$ | 4 | 8 | 18 | 32 | 50 |
| $3 n-1$ | 2 | 5 | 8 | 11 | 14 |

$\qquad$
Answer $\quad 2 n^{2}+3 n-1$

2 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
\frac{6}{2}=3
$$

|  | 7 | 18 | 35 | 58 | 87 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| $3 n^{2}$ | 3 | 12 | 27 | 48 | 75 |
| $2 n+2$ | 4 | 6 | 8 | 10 | 12 |

$\qquad$

3 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
\frac{2}{2}=1
$$

|  | 2 | 9 | 18 | 29 | 42 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $n^{2}$ | 1 | 4 | 9 | 16 | 25 |
| $4 n-3$ | 1 | 5 | 9 | 13 | 17 |

$\qquad$

$$
\text { Answer } \quad n^{2}+4 n-3
$$

4 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
\frac{10}{2}=5
$$

Answer $\quad 5 n^{2}-6 n+3$
$5 \quad$ Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.
[3 marks]

$\qquad$

$$
\text { Answer } \quad n^{2}-4
$$

6 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
\frac{4}{2}=2
$$

|  | 8 | 19 | 34 | 53 | 76 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| $2 n^{2}$ | 2 | 8 | 18 | 32 | 50 |
| $5 n+1$ | 6 | 11 | 16 | 21 | 26 |

$\qquad$
Answer $2 n^{2}+5 n+1$
$7 \quad$ Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

$$
-\frac{4}{2}=-2
$$

[3 marks]

|  | 11 | 10 | 5 | -4 | -17 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $-2 n^{2}$ | -2 | -8 | -18 | -32 | -50 |
| $5 n+8$ | 13 | 18 | 23 | 28 | 33 |

$$
\text { Answer }-2 n^{2}+5 n+8
$$

8 Here are the first four terms of a quadratic sequence.

Work out an expression for the $n$th term.

|  | 1.5 | 9 | 17.5 | 27 | 37.5 |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $0 . \mathrm{Sn}^{2}$ | 0.5 | 2 | 4.5 | 8 | 12.5 |
| $6 n-5$ | 1 | 7 | 13 | 19 | 25 |

$\qquad$
Answer $0.5 n^{2}+6 n-5$
