Here are some equations of straight lines. Match each equation on the left with one on the right so that the lines with those two equations are perpendicular. One has been done for you. [3 marks] 3y + 3x = 21y = 2x + 1 $y + \frac{1}{2}x = 7$ y = x + 8y + 4x = 12y = 4 - 3x3y = x + 612y + 3x = 60 $2y = 8 + \frac{1}{2}x$ y - 4x - 10 = 0
