

PRACTICE PAPER FOR

Edexcel Paper 2H (June 2025)

----- Disclaimer ------

This paper has been created based on the **most common** paper 2/3 topics from previous years and also careful analysis of what topics have already appeared in paper 1. The paper should be excellent at helping students revise for exams, however should not be relied upon as the basis for revision. The topics from this paper may well appear in the real exams, however there is absolutely no guarantee of this. Some topics may appear, some may not. Anybody giving you any sort of guarantee is misleading you. If any topics or questions from this paper do come up, this is just lucky guessing and nothing more. ⁽²⁾

Ultimately the best way to prepare for the exams is to revise all topics.

Answer ALL questions
Write your answers in the spaces provided
You must write down all the stages in your working.
(a) Use your calculator to work out $\frac{\sqrt{9001} + 46.4^2}{13.37}$
Write down all the figures on your calculator display.
(2) (b) Round your answer from part (a) to 2 significant figures.
(1) (Total for Question 1 is 3 marks)
The first four terms of an arithmetic sequence are
-2 8 18 28
Write down an expression, in terms of <i>n</i> , for the <i>n</i> th term of the sequence.

3	(a) Simplify $(h^4)^5$
	(1)
	(b) Write $\frac{5^{100} \times 5^{10}}{5^{-3}}$ as a power of 5
	(2) (Total for Question 3 is 3 marks)
4	Arthur invests £2000 in a bank. The bank pays annual compound interest at a rate of 3.5%
	Arthur wishes to withdraw his money when he has made at least £500 in interest.
	Work out how many years Arthur will need to wait before withdrawing his money.
	You must show your working clearly.
	(Total for Question 4 is 3 marks)

5 The table shows information about the temperatures in a city during the month of May.

Temperature, T (°C)	Frequency
$10 < T \le 14$	3
$14 < T \le 18$	6
$18 < T \le 22$	10
$22 < T \le 26$	8
$26 < T \le 30$	4

(a) Find the class interval that contains the median.

(b) Work out an estimate for the mean temperature in May. Give your answer to 1 decimal place.

(3)(Total for Question 5 is 4 marks)

.....

6 Jakob runs a 1500 m race.

He runs the first 800 m of the race in 2 minutes 40 seconds. He runs the final 700 m of the race in 2 minutes 5 seconds.

Jakob's average speed for the final 700 m is x% greater than his average speed for the first 800 m.

Work out the value of *x*.

(Total for Question 6 is 5 marks)

AC = 17.6 cmBD = 21 cm

Work out the perimeter of rhombus ABCD.

(Total for Question 7 is 4 marks)

6

Work out the size of the angle marked *x*. Give your answer to 1 decimal place.

(Total for Question 8 is 5 marks)

Provide the second seco

9 The school football club has at least 2 members from each year group.

The football coach needs to select two students, from different year groups, to be club captains.

There are 77 ways of selecting one student from Year 9 and one student from Year 10. There are 253 ways of selecting one student from Year 10 and one student from Year 11.

Work out the number of ways of selecting one student from Year 9 and one student from Year 11.

(Total for Question 9 is 3 marks)

10 Expand and simplify (x + 1)(2x - 1)(x + 4)

(Total for Question 10 is 3 marks)

11 The equation of a circle is $x^2 + y^2 = 696.96$	
(a) Write down the coordinates of the centre of the circle.	
	(1)
(b) Write down the radius of the circle	
(Total for	(1) Question 11 is 2 marks)
12 (a) Factorise $3x^2 + 4x - 7$	
	(2)
(b) Write $\frac{1}{3n} + \frac{8}{n^2}$ as a single fraction in its simplest form.	
(Total for	(2) Ouestion 12 is 4 marks)

13 The grouped frequency table gives information about the resting heart rates R, in BPM (beats per minute), of 120 adults.

Resting Heart Rate <i>R</i> , (BPM)	Frequency
$40 < R \le 50$	10
$50 < R \le 60$	16
$60 < R \le 70$	54
$70 < R \le 80$	28
$80 < R \le 90$	12

Resting Heart Rate <i>R</i> , (BPM)	Cumulative Frequency
$40 < R \le 50$	
$40 < R \le 60$	
$40 < R \le 70$	
$40 < R \le 80$	
$40 < R \le 90$	

(a) Complete the cumulative frequency table.

(1)

(b) On the grid, draw the cumulative frequency graph for this information.

www.1stclassmaths.com

13 (c) Use your graph to find an estimate for the median resting heart rate of the 120 adults.
BPM (1)
(d) Use your graph to find an estimate for the percentage of the 120 adults with a resting heart rate below 55 BPM.
(Total for Ouestion 13 is 6 marks)
(Total for Question 15 is o marks)
14 The straight line L has the equation $y = 7 - \frac{1}{4}x$ The point <i>A</i> has coordinates (-2, 9)
Find an equation of the straight line that is perpendicular to \mathbf{L} and passes through A .
(Total for Question 14 is 3 marks)

11

15 The diagram shows a prism. 7 cm 7 cm

The cross section is a sector of a circle with radius 6 cm and reflex angle 240° The height of the prism is 7 cm.

Work out the total surface area of the prism. Give your answer to 4 significant figures.

Video Solutions

18 Here is a cube.

The area of each face of the cube is 50 cm^2 , correct to the nearest square centimetre. The mass of the cube is 460 g, correct to the nearest 10 g.

The density of the cube is $D \text{ g/cm}^3$

By considering bounds, calculate the value of D to a suitable degree of accuracy. You must show all your working and give a reason for your answer.

(Total for Question 18 is 5 marks)

OAB is a sector of a circle. Point C is on the arc AB. AOD is a triangle. OBD is a straight line.

AO = 8cm Angle $ACB = 117^{\circ}$

Angle $ODA = 15^{\circ}$

Work out the area of triangle *AOD*. Give your answer to 1 decimal place.

(Total for Question 19 is 6 marks)

Video Solutions

20 Nena has only red, blue and green balloons.

The number of red balloons Nena has is *n*.

The number of blue balloons Nena has is 5 more than the number of red balloons. The number of green balloons Nena has is 5 more than the number of blue balloons.

Nena selects two of her balloons at random. The probability that both balloons selected are red is less than $\frac{1}{10}$

(a) Show that $n^2 - 97n - 210 < 0$

(4)

(b) By solving $n^2 - 97n - 210 < 0$ work out the **maximum** number of red balloons that Nena could have.
