1 A bag contains only red and green counters.

red counters : green counters = 3 : 5

What fraction of the counters in the bag are green? **[1 mark]**

Answer _____

2 The ratio of adults to children at a show is 13 : 2

What fraction of the people at the show are adults? **[1 mark]**

Answer _____

3 A driving test centre recorded the number of passes and fails during May.

passes : fails = 6 : 7

What fraction of the driving tests were passes? **[1 mark]**

Answer _____

4 Magnus records the results of his chess games during a tournament.

For his games, wins : draws : losses = 6 : 1 : 2

What fraction of the games does he lose? **[1 mark]**

Answer _____

4

Solutions

7 Penny throws a coin several times and records whether it lands on heads or tails.

$\frac{3}{7}$ of the throws landed on heads.

Write down the ratio number of heads : number of tails **[1 mark]**

Answer _____

8 Mark takes a maths test.

He gets $\frac{7}{10}$ of the answers correct and the rest incorrect.

For Mark's answers, write down the ratio correct : incorrect **[1 mark]**

Answer _____

9 Three quarters of the students in a class walk to school.

For the students in the class, write down the ratio

students who walk to school : students who do not walk to school **[1 mark]**

Answer _____

10 Tom runs a YouTube channel.

$\frac{1}{9}$ of the channel's viewers are subscribed.

Write down the ratio subscribed viewers : not subscribed viewers **[1 mark]**

Answer _____

9
